

Climate Analysis Process (CAP) Data Form

This form summarizes the Climate Analysis Process and provides a place for you to record your questions, notes, comments, and data interpretation as you follow the five steps and respond to a climatological data request.

Step 1: What are your critical questions about the area's weather/climate and the situation itself?

Step 2: Summarize the physical setting and climate of the location.

Geography:

Elevation and topography:

Climate:

Weather patterns:

Step 3: Refine your initial questions based on newly gathered information about the area's physical setting and climate.

Step 4: Explore relevant climate products and interpret the data.

Step 5: Resolve the request.
